LinkedIn: www.linkedin.com/in/callumhughes0/

Profile

I bring a multidisciplinary background in Mechanical Engineering (BEng) and Engineering for International Development (MSc, Distinction) with professional experience delivering data-led insights to support teams and shape decision-making. I have strong IT skills with experience in multiple softwares, including Excel, modelling softwares and coding programs (SQL, Python). My experience spans tailored research, risk and market analysis, and stakeholder engagement across a wide-range of industries.

Professional Qualifications

Academic Credentials

- **MSc Engineering for International Development** | University College London
 - *Distinction*
 - *Modules inc.*
 - *Water and Wastewater Treatment*
 - *Reliability, Risk and Resilience Engineering*
- **BEng Mechanical Engineering** | University of Nottingham
 - *Upper Second-Class Honours (2:1)*
 - *Dissertation: 'Strategies of Water Purification Using Membrane Filtration Technology in the Developing World'*

Technical Proficiencies

- **Data Analysis:** SQL, Python, Excel (*advanced functions, VBA, modelling*)
- **Data Visualisation:** PowerBI (*dashboard design, KPI reporting, DAX*), ArcGIS
- **Statistical Analysis:** Risk Modelling, Exposure Assessment
- **Soft Skills:** Clear communication, Cross-Functional Collaboration, and stakeholder presentation.

Professional Experience

Berkley Speciality London | Non-Natural Catastrophe Analyst

August 2024 - May 2025

- Collaborated with underwriting and data engineers to deliver actionable risk insights, translating complex datasets into business-aligned decisions.
- Produced reports and visualisations in Power BI to communicate findings to senior stakeholders, simplifying complex technical concepts for non-specialist audiences.

- Improved internal data validation workflows, ensuring clarity and traceability of requirements and assumptions.

Lloyd's of London | Tax Assistant

September 2023 - May 2024

- Coordinated with international teams to assess and communicate tax implications across jurisdictions, specialising in Australian and Singaporean GST regulations.
- Supported documentation and process optimisation for GST compliance
- Applied analytical thinking to business processes and contributed to internal efficiency projects

Raedas | Research Internship

February 2023 - March 2023

- Applied open-source intelligence (OSINT) to support investigations into global disputes, developing structured research, information synthesis, and reporting skills.
- Produced written analyses summarising findings for senior stakeholders, requiring clarity and precision in communication.

Voluntary Commitments

Young at Heart Ghana | Technology Infrastructure Project

October 2021 - March 2022

- Worked on bridging digital infrastructure gaps in schools, applying Python, MATLAB and ArcGIS to assess feasibility of technology deployment.
- Engaged with stakeholders to evaluate cost, accessibility, and long-term sustainability of solutions, building experience in applying data analysis to real-world infrastructure challenges.

Interests

I have a strong interest in travel, music, and sport. I boulder weekly, ski whenever possible, and play guitar. I also enjoy exploring new regions, having travelled across Europe and Asia, with plans to visit Central Asia next.
